SINDHU S

React Developer | MERN Stack

ssindhusivaselvam@gmail.com | 9345121231 | Ramanathapuram, Tamil Nadu | linkedin.com/in/sindhusivaselvam

PROFESSIONAL SUMMARY

React Developer with 1 year of experience building scalable, responsive web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Skilled in component-based architecture, state management (Redux, Context API), REST API integration, and Azure cloud storage. Adept at translating design mockups into pixel-perfect, mobile-first interfaces within Agile sprint teams.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design, Component Architecture
State Management: Redux, Context API
Backend Integration: Node.js, Express.js, REST API Design & Integration
Database: MongoDB
Cloud Services: Microsoft Azure Storage
Developer Tools: Git, GitHub, GitLab, Postman, VS Code, Chrome DevTools
Core Concepts: UI/UX Optimization, Performance Optimization, Version Control, Agile/Sprint Collaboration, Cross-Browser Compatibility

WORK EXPERIENCE

React Developer

Forge Your Peak | July 2025 – Present

- Developed 10+ responsive web application modules using React.js with functional components, hooks, and reusable component architecture, reducing duplicate code across pages.
- Built and optimized interactive user interfaces, translating design specifications into high-performance React components used across 6+ product screens.
- Integrated RESTful APIs using Node.js and Express.js backend for real-time data processing and athlete performance tracking.
- Implemented state management and data flow patterns using Redux and Context API to handle complex application logic and multi-step user interactions.
- Created interactive data visualization dashboards in React for displaying user performance metrics and progress analytics.
- Integrated Microsoft Azure Storage APIs for image and video file management within React applications, streamlining media upload workflows.
- Designed and implemented fully responsive layouts using CSS3 with a mobile-first approach, ensuring consistent UI across desktop, tablet, and mobile.
- Optimized React component performance through code splitting, lazy loading, and efficient re-render prevention, improving page load responsiveness.
- Collaborated with backend developers and designers in Agile sprints to ensure seamless API integration and pixel-perfect UI implementation.
- Used Git and GitHub for version control, branching, and code reviews within a collaborative sprint-based development workflow.

EDUCATION

Bachelor of Engineering in Electronics and Communication Engineering
University College of Engineering Ramanathapuram, Anna University | 2021 – 2025 | CGPA: 7.6

KEY PROJECTS

Vision and Cognitive Performance Training Platform

Forge Your Peak | React.js, Next.js, Node.js, MongoDB, Azure Storage, Redux

- Developed responsive React web application for vision and cognitive performance training with interactive assessment modules.
- Built reusable React components for assessment screens, result dashboards, and user profile pages with Redux/Context API state management.
- Integrated Node.js backend REST APIs for real-time assessment data, user authentication, and performance analytics; implemented fully responsive design across desktop, tablet, and mobile.

Athlete Performance Analytics Dashboard

Forge Your Peak | React.js, Node.js, MongoDB

- Developed comprehensive React dashboard for visualizing and analyzing athlete performance data and training progress.
- Built interactive charts and graphs using React components with real-time data updates and filtering/sorting/search functionality across multiple users.
- Designed responsive dashboard layout optimized for both desktop and mobile viewing with intuitive navigation.
